Forest Ecology and Management, 43 (1991) 317–318
Elsevier Science Publishers B.V., Amsterdam

Author Index

Antczak, A., *see* Kirby, K.J. et al.
Booth, T.H. and Pryor, L.D.
Climatic requirements of some commercially important eucalypt species 47
Bradshaw, Jr., H.D., Parsons, T.J. and Gordon, M.P.
Wound-responsive gene expression in poplars 211
Chan, W.K. and Griffiths, D.A.
The induction of mycorrhiza in *Eucalyptus microcorys* and *Eucalyptus torelliana* grown in Hong Kong 15
Cutter, B.E., Lowell, K.E. and Dwyer, J.P.
Thinning effects on diameter growth in black and scarlet oak as shown by tree ring analyses 1
Dwyer, J.P., *see* Cutter, B.E. et al.
Fong, F., *see* Newton, R.J. et al.
Funkhouser, E.A., *see* Newton, R.J. et al.
Goldfarb, B., *see* Strauss, S.H. et al.
Gordon, M.P., *see* Bradshaw, Jr., H.D. et al.
Greenwood, M.S., *see* Hutchinson, K.W. and Greenwood, M.S.
Griffiths, D.A., *see* Chan, W.K. and Griffiths, D.A.
Grigal, D.F., *see* Hairston, A.B. and Grigal, D.F.
Gustafsson, P., Jansson, S., Lidholm, J. and Lundberg, A.-K.
Structure and regulation of photosynthesis genes in *Pinus sylvestris* (Scots pine) and *Pinus contorta* (lodgepole pine) 287
Hairston, A.B. and Grigal, D.F.
Topographic influences on soils and trees within single mapping units on a sandy outwash landscape 35
Hard, J.S., *see* Reynolds, K.M. and Hard, J.S.
Harry, D.E. and Kimmerer, T.W.
Molecular genetics and physiology of alcohol dehydrogenase in woody plants 251
Hollingsworth, M.K., *see* Wheeler, C.T. et al.
Hooker, J.E., *see* Wheeler, C.T. et al.
Host, G.E. and Pregitzer, K.S.
Ecological species groups for upland forest ecosystems of northwestern Lower Michigan 87
Howe, G.T., *see* Strauss, S.H. et al.
Hutchinson, K.W. and Greenwood, M.S.
Molecular approaches to gene expression during conifer development and maturation . 273
Igboanugo, A.B.I.
Adaptations of shoot growth and leaf production of laboratory-grown cuttings of *Triplochiton scleroxylon* K. Schum in response to changes of irradiance 25
Jansson, S., *see* Gustafsson, P. et al.
Kellomaki, S. and Kurttio, O.
A model for the structural development of a Scots pine crown based on modular growth 103

Kimmerer, T.W., *see* Harry, D.E. and Kimmerer, T.W.
Kirby, K.J., Webster, S.D. and Antczak, A.
Effects of forest management on stand structure and the quantity of fallen dead wood: some British and Polish examples 169
Kurttio, O., *see* Kellomaki, S. and Kurttio, O.
Leak, W.B.
Secondary forest succession in New Hampshire, USA 69
Li, J.-Q. and Zhu, N.
Structure and process of Korean pine population in the natural forest 125
Lidholm, J., *see* Gustafsson, P. et al.
Lowell, K.E., *see* Cutter, B.E. et al.
Lundberg, A.-K., *see* Gustafsson, P. et al.
Mason, W.L., *see* Wheeler, C.T. et al.
McNeill, J.D., *see* Wheeler, C.T. et al.
Moffat, A.J., *see* Wheeler, C.T. et al.
Neale, D.B.
Molecular approaches to forest tree biology 179
Newton, R.J., Funkhouser, E.A., Fong, F. and Tauer, C.G.
Molecular and physiological genetics of drought tolerance in forest species 225
Otegbeye, G.O.
Variation among *Pinus oocarpa* provenances tested in the Savanna region of Nigeria 61
Parsons, T.J., *see* Bradshaw, Jr., H.D. et al.
Pregitzer, K.S., *see* Host, G.E. and Pregitzer, K.S.
Pryor, L.D., *see* Booth, T.H. and Pryor, L.D.
Reynolds, K.M. and Hard, J.S.
Risk and hazard of spruce beetle attack in unmanaged stands on the Kenai Peninsula, Alaska, under epidemic conditions 137
Sederoff, R., *see* Whetten, R. and Sederoff, R.
Sheppard, L.J., *see* Wheeler, C.T. et al.
Strauss, S.H., Howe, G.T. and Goldfarb, B.
Prospects for genetic engineering of insect resistance in forest trees 181
Tauer, C.G., *see* Newton, R.J. et al.
Webster, S.D., *see* Kirby, K.J. et al.
Wheeler, C.T., Hooker, J.E., Hollingsworth, M.K., McNeill, J.D., Mason, W.L., Moffat, A.J. and Sheppard, L.J.
The effect of inoculation with either cultured *Frankia* or crushed nodules on nodulation and growth of *Alnus rubra* and *Alnus glutinosa* seedlings in forest nurseries 153
Whetten, R. and Sederoff, R.
Genetic engineering of wood 301
Zhu, N., *see* Li, J.-Q. and Zhu, N.

Forest Ecology and Management, 43 (1991) 319–221
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Alcohol dehydrogenase
Molecular genetics and physiology of alcohol dehydrogenase in woody plants 251
Alnus
The effect of inoculation with either cultured Frankia or crushed nodules on nodulation and growth of *Alnus rubra* and *Alnus glutinosa* seedlings in forest nurseries 153
Biology
Molecular approaches to forest tree biology 179
Climate
Climatic requirements of some commercially important eucalypt species 47
Conifer
Molecular approaches to gene expression during conifer development and maturation . 273
Dead wood
Effects of forest management on stand structure and the quantity of fallen dead wood: some British and Polish examples 169
Defense mechanisms
Wound-responsive gene expression in poplars 211
Dendroctonus
Risk and hazard of spruce beetle attack in unmanaged stands on the Kenai Peninsula, Alaska, under epidemic conditions 137
Drought tolerance
Molecular and physiological genetics of drought tolerance in forest species 225
Ecological species groups
Ecological species groups for upland forest ecosystems of northwestern Lower Michigan 87
Ecosystems
Ecological species groups for upland forest ecosystems of northwestern Lower Michigan 87
Eucalyptus
Climatic requirements of some commercially important eucalypt species 47
The induction of mycorrhiza in *Eucalyptus microcorys* and *Eucalyptus torelliana* grown in Hong Kong 15
Forest management
Effects of forest management on stand structure and the quantity of fallen dead wood: some British and Polish examples 169
Forest succession
Secondary forest succession in New Hampshire, USA 69
Frankia
The effect of inoculation with either cultured *Frankia* or crushed nodules on nodulation and growth of *Alnus rubra* and *Alnus glutinosa* seedlings in forest nurseries 153
Gene expression
Molecular approaches to gene expression during conifer development and maturation . 273
Wound-responsive gene expression in poplars 211

Genetic engineering
Genetic engineering of wood 301
Prospects for genetic engineering of insect resistance in forest trees 181
Inoculation
The effect of inoculation with either cultured *Frankia* or crushed nodules on nodulation and growth of *Alnus rubra* and *Alnus glutinosa* needlings in forest nurseries 153
Insect resistance
Prospects for genetic engineering of insect resistance in forest trees 181
Irradiance
Adaptation of shoot growth and leaf production of laboratory-grown cuttings of *Triplochiton scleroxylon* K. Schum in response to changes of irradiance 25
Leaf production
Adaptations of shoot growth and leaf production of laboratory-grown cuttings of *Triplochiton scleroxylon* K. Schum in response to changes of irradiance 25
Modular growth
A model for the structural development of a Scots pine crown based on modular growth 103
Mycorrhiza
The induction of mycorrhiza in *Eucalyptus microcorys* and *Eucalyptus torelliana* grown in Hong Kong 15
Natural forest
Structure and process of Korean pine population in the natural forest 125
Oak
Thinning effects on diameter growth in black and scarlet oak as shown by tree ring analyses 1
Photosynthesis
Structure and regulation of photosynthesis genes in *Pinus sylvestris* (Scots pine) and *Pinus contorta* (lodgepole pine) 287
Picea
Risk and hazard of spruce beetle attack in unmanaged stands on the Kenai Peninsula, Alaska, under epidemic conditions 137
Pinus
A model for the structural development of a Scots pine crown based on modular growth 103
Structure and process of Korean pine population in the natural forest 125
Structure and regulation of photosynthesis genes in *Pinus sylvestris* (Scots pine) and *Pinus contorta* (lodgepole pine) 287
Variation among *Pinus oocarpa* provenances tested in the Savanna region of Nigeria 61
Poplar
Wound-responsive gene expression in poplars 211
Secondary
Secondary forest succession in New Hampshire, USA 69
Shoot growth
Adaptations of shoot growth and leaf production of laboratory-grown cuttings of *Triplochiton scleroxylon* K. Schum in response to changes of irradiance 25
Spruce beetle
Risk and hazard of spruce beetle attack in unmanaged stands on the Kenai Peninsula, Alaska, under epidemic conditions 137
Thinning
Thinning effects on diameter growth in black and scarlet oak as shown by tree ring analyses 1

Topography
Topographic influences on soils and trees within single mapping units on a sandy outwash landscape 35
Triplochiton
Adaptations of shoot growth and leaf production of laboratory-grown cuttings of *Triplochiton scleroxylon* K. Schum in response to changes of irradiance 25
Upland forests
Ecological species groups for upland forest ecosystems of northwestern Lower Michigan 87
